About Robland

Mission

*"Made to Create,
Built to Last"*

Vision

At Robland, we believe in the power of creativity. As passionate **makers**, from design to production, we are committed to handling every step ourselves. Our woodworking machines are more than just tools; they are the keys to creativity for our clients. This completes the circle: we make the machines that enable makers to create.

The second part of our slogan, "Built to Last" stands for **durability** and **reliability**. We build machines that last for decades, not just a few years. Thanks to our own production facilities, we can guarantee a lifetime supply of spare parts. This is a point of pride for us, especially since our production is still based in Europe. We consciously choose European suppliers who share our values of high quality, rejecting cheaper imports.

The result? The **highest quality** machines with the **fastest delivery** times. At Robland, we create a future for makers. Every component, every machine and every innovation reflects our commitment to excellence and sustainability. We are Robland, made to create, built to last.

"Robland is always the cheapest, you only have to buy one."
Gert Muijs - CEO

"The brightest engineering is solving a complex problem with a simple solution"
Johan Landuyt - Owner Robland

Quick Response Manufacturing

The key to Focus and Growth

Quick Response Manufacturing (QRM) is a revolutionary growth strategy that has been implemented across our entire organization. This strategy shifts the focus from traditional cost-thinking to reducing lead times. Why? Because in a rapidly changing market, time is much more important than cost.

We used to do mass production

"When Robland was established, our production strategy was simple: one type of machine, produced in large quantities—a clear example of lean production focused on efficiency and mass production. At that time, we produced up to 5000 X310 combined machines each year!"

The challenges of expanding our range

Over the years, our range has greatly expanded; we now produce more than 50 models in different variations. This shift presented us with new challenges. Eliminating waste in a mass production setting was no longer sufficient. We needed to be more flexible.

QRM as a new company strategy

This led us to Quick Response Manufacturing. QRM enables us to drastically reduce lead times and to respond quickly and efficiently to the unique needs of each customer. Now, we are able to produce our wide range while improving our quality and minimizing lead times.

New Strategy, New Values

SIMPLICITY

- Intuitive machine control
- Kanban planning
- Reusage of system solutions
- New price list
- Spare parts platform Components Engine
- New website with easy accesible information

SUSTAINABILITY

- Innovative technologies
- Lifetime spare parts
- Online communication
- European suppliers for raw materials
- 3D-printing with re-usable materials
- Cardboard packaging

SPEED

- Working in teams
- Contact form on website
- Aftersales support
- Weekly social media updates
- Monthly new machine releases
- 3D-printing
